

Job-Site Photo Checklist

Contractor Review and Proof System
Version 1.0

Photo Sequence

Before work: capture the condition, access area, visible problem, and one wide context shot when safe.

During work: capture useful progress, parts, materials, protection, and workmanship details without disrupting the job.

Completed work: capture a clean wide shot, medium shot, detail shot, and any visible improvement that does not reveal private information.

Quality Rules

Use good light, avoid blurry photos, hold the phone steady, take both horizontal and vertical options when useful, and clean up tools or debris before the final photo.

Avoid addresses, license plates, family photos, children's items, alarm panels, documents, pets, and anything the customer would reasonably consider private.

Trade Examples

HVAC: equipment before, new unit, clean lines, thermostat, work area after cleanup.

Plumbing: fixture before, repair area, new water heater, drain work, cleaned work area.

Roofing: roof plane, flashing detail, completed shingles, cleanup, gutter detail.

Electrical: panel area, labeled work, fixture install, outlet repair, clean finish.

Landscaping: before area, grading, planting, hardscape detail, finished outdoor space.

Pest control: entry point, exclusion work, treatment area, sealed gap, general exterior.

File Naming

Use date, general location, service, and job reference. Example:
2026-07-raleigh-water-heater-job142-after.jpg.
